

BAUWERK Colour Garden Pot Paint

For painting Terracotta Pots in any colour

For an imperfect perfect finish for your concrete or terracotta garden pots.

Use

Use

Quickly create a new variety of colours for your flower pots at your home, balcony, patio or garden without damaging your plants, soil or groundwater.

Paint with colours from season to season, paint everything uniformly or mix up colours.

Your flower pots look better over time, because the paint ages beautifully and develops its own patina.

Properties

Suitable for all unsealed planters made of terracotta, concrete or artificial stone

- vapour permeable natural paint lets the roots of your plants “breathe” in the flower pots
- fast, easy application
- matte drying, natural appearance
- re-paintable, many design options
- pure mineral vegan product
- completely free of solvents
- brush easily cleans with water, no pollution of the groundwater

Properties

How to

- shake well before opening, then stir well
- transfer to a slightly larger container and make sure all colour pigments are well mixed
stir every 2–3 minutes
- briefly clean and moisten the planter pot before painting
- do not apply paint too thick and stretch out well in all directions
- at first, the colour appears a bit darker and more transparent, this will change after drying
- apply a second or third coat after drying

Brush care: simply rinse with water, press into shape again, then let it dry upright.
